SPaulding REHABILITATION NETWORK
Dear Friends and Colleagues:

As the Executive Director of BIA-MA, I would like to invite you to participate in our 33rd Annual Brain Injury Conference on March 27, 2014 at the Best Western Royal Plaza Hotel in Marlborough, MA. This year’s conference, which is being held during Brain Injury Awareness Month, will feature two dozen workshops on a number of topics, including brain injury treatment options, tips and strategies, and alternative therapies.

Each year, we gather together to discuss the challenges facing professionals, survivors and family members by educating ourselves on the developments in the brain injury field. Whether you are a professional, caregiver or survivor, there are many workshops you will find informative and inspirational. Last year's conference was well received, attracting over 650 attendees. We look forward to another successful event.

Conference registration includes breakfast, lunch, educational workshops and opportunities to network and meet exhibitors. Become a BIA-MA member to receive a discount on your conference registration or promote your company as a sponsor and receive an exhibit booth.

Hope to see you in March!

Warm Regards,

Nicole M. Godaire
Executive Director

Keynote Speaker

Joseph T. Giacino, Ph.D.
Director of Rehabilitation Neuropsychology; Director, SRN Disorders of Consciousness Program; Project Director, Spaulding-Harvard TBI Model System

Dr. Joseph T. Giacino is the Director of Rehabilitation Neuropsychology in the Department of Physical Medicine and Rehabilitation at Spaulding Rehabilitation Hospital, consulting Neuropsychologist in the Department of Psychiatry at Massachusetts General Hospital, Associate Professor in the Department of Physical Medicine and Rehabilitation at Harvard Medical School and Adjunct Professor at the MGH Institute of Health Professions. For the last ten years, his work has focused on developing neurobehavioral and functional neuroimaging methodologies to characterize the pathophysiologic, neurocognitive and functional sequelae of severe acquired TBI and disorders of consciousness. He is currently Project Director of the Spaulding-Harvard TBI Model System and Co-PI of the NIH-funded Transforming Research and Clinical Knowledge in TBI project which will design and test a new platform of clinical, imaging, genomic and outcome biomarkers to enable more precise TBI diagnosis, prognosis and treatment.

Assessment and Treatment of Individuals with Brain Injury: The State of the Science

This keynote provides an update regarding recent evidence concerning diagnosis, prognosis and assessment procedures and treatment interventions related to individuals with severe acquired traumatic brain injury. Discussion will include a review of the behavioral, neuroimaging, and electrophysiologic approaches to diagnosis and prognosis of individuals with disorders of consciousness, as well as information on the effectiveness of treatment approaches used in this population.
Continuing education credits are offered in the registration price for professionals in the following fields: (If CEUs do not apply, you may request a Certificate of Attendance on the conference registration form)

- Audiologists
- Case Managers*
- Certified Brain Injury Specialists
- Educators
- Licensed Alcohol & Drug Counselors (LADC: I-III)
- Licensed Mental Health Counselors
- Nurses
- Nursing Home Administrators
- Occupational Therapists
- Physical Therapists
- Psychologists
- Recreation Therapists*
- Rehabilitation Counselors*
- Social Workers
- Speech-Language Pathologists

*Applications for these CEUs have been submitted.

Psychologists: Commonwealth Educational Seminars is approved by the American Psychological Association to sponsor continuing education for psychologists. Commonwealth Educational Seminars maintains responsibility for these programs and their content. Psychologists attending this program receive 6 hours of credit.

Continuing education credit is provided in part by Commonwealth Educational Seminars.

Audiologists and Speech Language Pathologists:

This course is offered for 0.6 ASHA CEU’s (Intermediate level, Related Area)

Information pertaining to financial and non-financial relationships can be found on the BIA-MA website at www.biama.org

To obtain a Continuing Education Certificate, each professional must sign in at the CEU registration table, attend the Keynote Address and three workshop sessions, for a total of 6 hours, and sign out at the end of the day. This year we will be using an online certification process: Evaluations must be submitted within one week of the close of the conference to receive certificates. Further details will be provided upon registration.

## Conference Committee

- **Donna Beaudin, OTR/L, CBIST**
- **Eileen Chernoff, RN, MBA, LicNHA**
- **Daniel Coughlan, PT, NCS**
- **Ruth Crowley, MS, CCC-SLP**
- **Danna Delaney-Young, CBIS**
- **Michelle Demore-Taber, ScD, CRC, LRC, CBIS**
- **Nicole Godaire, CBIS**
- **Marine Johanson, LPN**
- **Sally Johnson, LICSW**
- **William Kowalczyk**
- **Laura MacFeeley**
- **Sandra Madden**
- **Myles Marisseau**
- **Janet McBride-Roy, CTRS**
- **Zelinda Pereira**
- **Tress Ricker, LSW**
- **Lisa Saba, CBIS**
- **Stacey Sirotta, MSPT, DPT, CBIS**
- **Jeff Ventola**
A. Effects of an Intensive Exercise Program on Fitness and Function for People with Long Term-Brain Injury

Intended Audience: All

Ann L. Charrette, PT, DPT, MS, PCS, NCS, Associate Professor, School of Physical Therapy, MCPHS University, Worcester; SLI Wellness Center Research Associate; board certified as a Pediatric Clinical Specialist, and Neurologic Clinical Specialist.

This workshop will describe a study (completed) to evaluate if participation in a six-week, high intensity exercise program (conditioning, strengthening and coaching geared at the highest level possible for each individual) will change the individual’s endurance, self-efficacy, activity level and gait speed, and participation in the community. Study participants are long-term survivors of brain injury, living in a community setting.

B. Building Community for Brain Injury Survivors

Intended Audience: All

Barbara P. Kresge, MS, OTR/L, CBIS and Lisa A. Hanson, BSW, CCM, CBIS, Co-Directors at the Krempels Center, Portsmouth, NH.

This highly interactive workshop explores the concepts of community and social capital, and the positive impact these concepts have upon recovery and quality of life. Participants will identify the importance of social capital and the communities to which they belong, and how a brain injury can impact this. Together, we will explore ways of developing and promoting a sense of community across all healthcare settings and in the environments in which survivors and their families live.

C. Hands-on Practicum for Cognitive Rehabilitation – Techniques for Use Across the Care Continuum – Part 1

Intended Audience: Professionals

Donna Beaudin, OTR/L, CBIST, Dale Goldstein, MS, CCC/SLP, Pamela King, OTR/L, Erin Patterson, MS, CCC/SLP, and Susan Rapsis, OTR/L – Northeast Rehabilitation Hospital Network.

A two-part session focusing on the practical application of key cognitive realms (attention, memory, language, executive functions and awareness). Attendees will learn theory and will get to experience “hands on” practice with treatment techniques. Participants MUST ATTEND both Sessions 1 and 2.

D. Home Visit Safety Training: Developing a Safety Plan of Action for Workers

Intended Audience: Professionals

Sabrina Cazeau-Class, MS, Director, Protective Services Department, Massachusetts Rehabilitation Commission

A workshop designed to assist the Case Worker to recognize and address potential threats to personal safety during the course of a home visit. In addition, levels of risk will be discussed with an overview of the assessment process, which should take place before, during, and after a home visit.
**E. Music Therapy for Self-Expression: Opening the Lines of Communication**  
*Intended Audience: Survivors, Families, Caregivers*  

Christina S. Cetnar, MS, MT-BC, *Director of Life Skills, Wingate Healthcare*

This program will educate participants about music therapy and its many interventions that can be used for self-expression. Includes a presentation, and also provides opportunities for interactive experience of music therapy techniques. Geared for brain injury survivors and caregivers, however clinicians are welcome to attend.

**F. Sleep Disorders Following a TBI**  
*Intended Audience: All*  

Kevin A. Domingos, PhD, *Clinical Director, Boston Neuropsychological Services, LLC*

This program will review aspects of normal sleep patterns, benefits of sleep, and sleep disorders. A discussion of how a traumatic brain injury can exacerbate a previous sleep disorder, or contribute to new sleep/wake cycle pathology.

**G. Working with Challenging Families**  
*Intended Audience: Professionals only*  

Mary Crowe, LICSW, ACNP-SW, *Education Coordinator at Care Dimensions (formerly Hospice of the North Shore & Greater Boston)*

This program explores what makes a family challenging, and provides solutions for professionals to work more effectively with families in all situations.

<table>
<thead>
<tr>
<th>SESSION 2</th>
<th>1:00 – 2:30 pm</th>
</tr>
</thead>
</table>
| **H. Opportunities for Community Living through Home and Community-Based Waiver Services (HCBS): Acquired Brain Injury Waivers and Money Follows the Person Waivers.**  
*Intended Audience: All* |  
Randy Webster and Gail Grossman, *Department of Developmental Services, Nina Rosenberg and Don Chamberlain, Massachusetts Rehabilitation Commission, and Amy Bernstein, Office of Medicaid.*  
  
A panel representing the Mass. Rehabilitation Commission, Department of Developmental Services, and the Office of Medicaid will provide an overview of the Acquired Brain Injury Waivers (ABI) and the Money Follows the Person Waivers (MFP). We will describe each of the waivers, the MFP Demonstration Grant, the role of Transition Coordination, and will also provide an update on the transition of the case management supports for these waivers. |
| **I. Centered Caregiving: Mind-Body Strategies for Self-Care**  
*Intended Audience: Caregivers* |  
Katie Cohen, MEd, LCSW, RYT *(Registered Yoga Teacher)*  
  
Are you stressed, tired, pulled in too many directions? Do you battle anxiety, fatigue, depression? Feeling overwhelmed? Imagine if you had the tools to be calm, energized, focused, balanced and centered. This workshop will offer simple mind/body tools, techniques and strategies to feel refreshed, rejuvenated and empowered – a new outlook on the crucial role of SELF-CARE in caregiving. |
J. Hands-on Practicum for Cognitive Rehabilitation – Techniques for Use Across the Care Continuum – Part 2  
Intended Audience: Professionals

Donna Beaudin, OTR/L, CBIST, Dale Goldstein, MS, CCC/SLP, Pamela King, OTR/L, Erin Patterson, MS, CCC/SLP, and Susan Rapsis, OTR/L – Northeast Rehabilitation Hospital Network

A two-part session focusing on the practical application of key cognitive realms (attention, memory, language, executive functions and awareness). Attendees will learn theory and will get to experience “hands on” practice with treatment techniques. Participants MUST ATTEND both Sessions 1 and 2.

K. Disinhibition, Perseveration and Impulsivity – Oh My!: Useful Interventions Across the Span of Brain Injury Recovery  
Intended Audience: Professionals & Caregivers

Rachel Andaloro, PsyD, Metrowest Neuropsychology, LLC

This workshop will review behavioral strategies that caregivers and professionals can utilize to help manage the cognitive, emotional, behavioral, communication, social and physical changes associated with brain injury. Discussion will focus on executive dysfunction and the strategies professionals and caregivers can implement to support their loved one, student, or client after a brain injury.

L. Traumatic Brain Injury: Analysis of Functional Deficits and Post-Hospital Rehabilitation Outcomes  
Intended Audience: Professionals

Gordon J. Horn, PhD, National Deputy Director of Clinical Outcomes Services, NeuroRestorative

The first objective of this workshop will be to describe the nature and severity of the problems experienced by today’s TBI survivors after hospital care within the United States. Those studied were within a facility-based post-hospital level of care requiring supervision for all activities. The second objective evaluates the efficacy of residential post-hospital brain injury programs in reducing disability and improving independent functioning.

M. Dysphagia Management in Patients with Brain Injury  
Intended Audience: Professionals Only

Olga Kaminski, MS, CCC-SLP, and Althea Wagman-Bolster, MS, CCC-SLP, BCS-S, New England Rehabilitation Hospital

This workshop will focus on management of dysphagia in patients with acquired or traumatic brain injuries. Discussion will present literature-based and experience-based information that considers dysphagia in the setting of negative challenging behaviors and significant cognitive deficits. Treatment strategies and case studies will be discussed.

N. Live, Love and Celebrate Marriage with Brain Injury  
Intended Audience: Survivors, Family

Suzanne Doswell, CBIST, Western Regional Manager, BIA-MA; Scott Doane, Western Regional, BIA-MA; Jennifer Doane, MSW, Helen Stewart, RN Western Regional, BIA-MA

Many relationship challenges can occur when at least one spouse or partner has a brain injury. This panel will focus on ways to cope with the unexpected: changes in roles, responsibilities, communication, intimacy and dreams.
### Session 3  
2:45 – 4:15 pm

**O. Rebuilding Social Skills for Survivors…..the ups and downs!**  
*Intended Audience: Survivors*

**Bob Cluett, CEO, Lash & Associates Publishing/Training Inc.**

An interactive workshop for survivors focused on building successful strategies and avoiding pitfalls in social situations. Discussion topics include: initiating conversation, building friendships, self-monitoring behavior, stress management, and building self-esteem.

**P. Health and Wellness benefits of Yoga, Breath Awareness and Mindful Movements**  
*Intended Audience: All*

**Katie Cohen, MEd, LCSW, RYT (Registered Yoga Teacher)**

If you can breathe, you can do yoga-no experience required. No bending or twisting yourself into a pretzel! We will focus on the mind/body connection through breath awareness and mindful movements, discovering a relaxed state of centered bliss! Please wear comfortable clothing to move freely; bring a yoga mat if desired (limited mats available). Modifications/adaptations will be made for chairs, it’s not necessary to be on the floor to experience a benefit. If you’ve never tried yoga, here is your chance - don’t miss it!

**Q. Adult Foster Care: Offering Caregiver Support Solutions**  
*Intended Audience: All*

**Rosie McKenna, MEd, Care Manager/Community Relations Liaison, Adult Foster Care of the North Shore; Hillary Pacheco, CBIS, Program Manager, Host Home and Neuro Rehab Services, NeuroRestorative; Lisa Prince, MS, LSW, AFC Program Director, Tri-Valley, Inc., President of MA Council for AFC; Lisa Yorra, Admissions Director, Harbor Health Services**

What can Adult Foster Care offer for adults with disabilities or chronic illness in need of daily personal care, when they prefer to remain in the community? Health care professionals will gain a broader understanding of this program so they may better serve their clients and families who benefit from it.

**R. Task-Specific Training to Maximize Upper Extremity Function Following Brain Injury**  
*Intended Audience: Professionals*

**Kristen M. Andrew, PT, DPT; Merideth Donlan, PT, DPT; Gwendolyn Larsen, PT, MSPT; Angela Stauble, MS, OTR/L, Community Rehab Care**

This workshop is designed for rehabilitation professionals who work with clients post acquired brain injury, on maximizing motor and functional recovery. Principles of neuroplasticity will be discussed along with implications for goal-setting and treatment decisions. Task-specific training will be illustrated with specific case examples to demonstrate how these rehabilitation techniques can be implemented into a physical and occupational therapy plan of care.
| S. | Ambassadors and Advocacy – Learn how our BIA-MA Ambassadors help to further our mission of support, prevention, education and advocacy  
Intended Audience: All  
Kelly Buttiglieri, JD, Ambassador Program Coordinator, BIA-MA  
Panel of Ambassadors will share their experiences speaking on behalf of the program. Attend this workshop to learn how survivors and family members can become advocates for TBI/ABI legislation. |
|---|---|
| T. | Is Improvement Still Possible Years After a Brain Injury?  
Intended Audience: All  
Therese O’Neil-Pirozzi, ScD, SLP Program Director & Associate Professor, Northeastern University; Associate Project Director, Spaulding-Harvard Traumatic Brain Injury Model System, Spaulding Rehabilitation Network; Daniel McNamee, Stroke Survivor  
When does improvement after a brain injury stop? Does it have to stop? Are there examples of improvement continuing years after a brain injury? In this workshop, a clinician and a stroke survivor with aphasia will address these questions from research, clinician and survivor perspectives. Strategies to increase survivor health and function will be presented. |
| U. | Use of Cognitive and Communication Strategies to Enhance Care Transitions for Persons with Acquired Brain Injuries.  
Intended Audience: All  
Amy Karas, MS, CCC-SLP and Janet McBride-Roy, CTRS, Community Rehab Care  
Challenges along the continuum of care can impact long term recovery and stabilization. The purpose of this presentation is to highlight successful cognitive and communication strategies that case managers and family members can utilize to enhance independent living skills and prepare for a variety of transitions for their clients living with ABI. |
| V. | Mindfulness-Based Stress Reduction  
Intended Audience: All  
Adam Liss, Director, Cape Stress Reduction & Optimal Health  
Mindfulness-Based Stress Reduction (MSBR) helps people learn how to take better care of themselves and live healthier, more balanced lives. MSBR is about being aware of the workings of our minds and bodies on a moment by moment basis. It allows us the opportunity to see more clearly our habitual approaches to living, and to begin to make more conscious choices about how we live our lives. |
